

Sample letter to the Arizona Power Plant and Line Siting Committee:

Go to: <https://efiling.azcc.gov/cases> and click “Log In” or “Create Account”. Once logged in, click on “E-File Documents” in upper left corner.

Enter Docket# **L-00000C-26-0125-00261** and upload your statement. You must include the docket number on the front page of your letter!

Dear Members of the Committee:

RE: L-00000C-26-0125-00261
The Santa Rita Connection Project

I am extremely concerned that Hudbay Minerals and Tucson Electric Power Company are planning to jointly construct the Santa Rita Substation as part of the pending Santa Rita Connection under review by your Committee.

This joint project could result in ratepayers such as myself subsidizing Hudbay’s cost to connect the Copper World mine to TEP’s power grid.

I respectfully request the Committee requires TEP to amend its application for a Certificate of Environmental Compatibility and fully disclose the TEP-Hudbay joint venture to build the Santa Rita Substation.

The amended filing should disclose the financial terms of constructing the substation and how much power Copper World will require compared to other users that will benefit from the Santa Rita Connection.

I also request that the Committee requires TEP to submit a System Impact Study prepared by an independent consultant to determine the impact of adding Copper World to TEP’s electric system.

Thank you,
